

ABDELKADER BENAJIBA

SOFTWARE ENGINEER

github.com/AbdoCooder | linkedin.com/in/benajiba
 abdocooder@gmail.com | +212682546206

PROFILE

Software Engineer with strong foundations in computer science, low-level systems, and distributed architectures. Trained at 1337 Coding School (42 Network), with hands-on experience in C/C++, web development, Docker-based infrastructure, and distributed system design. Currently pursuing a Master's in Software Quality (MQL). Motivated to apply problem-solving discipline and AI skills in a production-oriented engineering environment.

PROJECTS

Webserv — HTTP/1.1 Server | C++ | 3-person team 05-2026

- Designed the system architecture and led task distribution across the team.
- Developed the core engine and event loop using socket programming and non-blocking I/O.
- Achieved +99% availability under Siege stress testing with +200 concurrent connections for 1m duration.

Inception — Docker Infrastructure & System Administration | Solo 03-2026

- Architected a multi-container Docker infrastructure (NGINX, WordPress, MariaDB) with custom Dockerfiles, TLS encryption, and isolated networking with persistent volumes.
- Extended the stack with 5 bonus services — Redis, FTP, Adminer, a static portfolio site, and a custom monitoring service.
- Enforced zero hardcoded secrets and automatic crash recovery, sustaining 100% uptime across all 8 containers.

Distributed Task Manager — Java Master-Slave Architecture | 3-person team 01-2026

- Designed the **shared communication protocol** (message format and task types) used across master, slave, and client nodes, ensuring unambiguous, robust data exchange over **TCP sockets**.
- Developed the **master node**, orchestrating task distribution, dynamic payload JAR execution, and result aggregation across **4 containerized nodes**.
- Implemented **node failure handling** via process monitoring and compose restarts to maintain system robustness.

EDUCATION

Abdelmalek Essaadi University | Faculty of Sciences Tetouan Sep 2025 — Present
MASTER — SOFTWARE QUALITY (MQL)

Semester 1 Completed

UM6P | 1337 Coding School | 42 Network Oct 2024 — Present
ARCHITECTE EN TECHNOLOGIE NUMÉRIQUE

Level 9.74 (Ongoing), Campus MED

Abdelmalek Essaadi University | Faculty of Sciences Tetouan Nov 2022 — Jul 2025
BACHELOR — MATHEMATICS & COMPUTER SCIENCE (SMI)

TECHNICAL SKILLS

- Languages:** C, C++, Java, Python, Bash
- Systems & Networking:** Socket programming, TCP/IP, HTTP/1.1, non-blocking I/O, event-driven architecture, process management, multithreading & synchronization
- Infrastructure & DevOps:** Docker, Docker Compose, NGINX, Linux/Unix administration, TLS, CI/CD basics
- Databases:** MariaDB, MySQL
- Tools & Practices:** Git, Maven, Makefile, Agile/Scrum basics, Unit Testing
